

BUYING GUIDE

Baby sleep

Cots, mattresses and accessories

Safety and comfort for your little one

It's wonderful to be a new parent but it can also be rather worrying. That's why our cots are rigorously tested to ensure they meet the strictest safety standards that exist in the world. Our cots are durable and stable, and they adjust to fit babies as they grow so quickly. So you can sleep like a baby, too.

For sweet dreams and safe sleeping

No parent should have to choose between affordability and their little one's safety and comfort. That's why we designed our cot mattress range. Every single one of our firm, well-ventilated cot mattresses meet strict safety standards. So it's not only your little one who will be resting well at night.

All the products (shown here) may not be available at the store. Please contact the staff or look at www.IKEA.com for more information. For more detailed product information, see the pricetag and the Internet. All units require assembly.

SAFETY IS OUR TOP PRIORITY

Children's safety is always our highest priority

Our products are designed and tested to comply with all applicable safety requirements in the countries where the products are sold. We also test all our children's products at our own accredited test laboratory in Sweden, as well as at independent accredited test laboratories and institutes around the world.

IKEA fulfils the following safety criteria for cots and mattresses around the world: Cots for the European market are tested by test laboratories in Europe and comply with European standard EN 716-1. Mattresses in the European market comply with EN 16890, a requirement specified by the European Committee for Standardisation, Comité Européen de Normalisation (CEN).

If you want to learn more about a specific safety or test standard, please contact the *local consumer organisation* or the authority that has issued the standard.

How are our cots tested?

All our cots undergo several different tests to ensure they are safe to use. First, they are inspected for any protruding parts, loose parts or fittings, and sharp edges. Then, all gaps and openings between spindles and the slats in the cot base are measured. The cot is tested with impact and pressure tests for strength, stability and durability and to ensure that the spindles will not twist or rotate from their position and create potentially hazardous openings. The cot base is also tested. For example, in a test for the European market, we subject the cot base to impact from a 10 kg weight that is dropped 1,000 times from five different positions.

The same or similar tests are made on cot bases for cots on all markets where we are active, but the tests may differ somewhat, depending on the specific requirements of the respective country.

GOOD TO KNOW

1. No small components that can be removed, or worked loose, to eliminate the risk of choking.
2. Rounded edges and corners.
3. Ventilated cot base to avoid fungal growth.
4. Strong cot base.
5. The gap between the spindels is designed for optimum safety (babies cannot get their head stuck between them).
6. Stable, durable construction.
7. Non-toxic materials and surface treatment.

HOW TO CHOOSE A COT

Identify individual needs

Both you and your baby will sleep better if you use a cot for the baby. A cot is an enclosed, yet well-ventilated, sleeping environment that your baby cannot roll out of and will not get too warm or uncomfortable in. Most infants sleep deeply and are not easily disturbed by noise, voices or music. However, they do not sleep for long periods at a time and wake up frequently. The enclosed sleeping environment of a cot helps your baby feel sheltered and protected.

In our selection you can find cots with a traditional touch or cots with modern shapes. Choose according to your style so it fits with your home.

Designed to grow with your baby

Different living situations require different solutions – but all babies grow fast. That’s why most of our cots are designed so that one side can be removed when the baby is big enough to climb into/out of the cot, transforming it into a bed.

1. When the baby is very small the base can be placed at the higher position.

2. As soon as the baby starts to sit by themselves, place the base at the lower position.

3. When the child is big enough to climb into the bed, one cot side can be removed.

ALL COTS AND PRICES

We have a wide variety of cots in different styles and finishes. No matter which of our cots you choose, you can be sure of one thing - every detail is well-thought-out. For your baby's safety, always use the same size on cot and mattress to avoid gaps that the baby's head could become trapped in.

GONATT 60x120 cm. The cot base can be placed at two different heights. One cot side can be removed when the baby is big enough to climb into/out of the cot. Your baby will sleep both safely and comfortably as the durable materials in the cot base have been tested to ensure they give their body the support it needs. The cot base is well ventilated for good air circulation which gives your baby a pleasant sleeping climate. Drawers at the bottom of the cot provide extra storage.

Light grey 903.667.35 **Rp4.999.000**

STUVA/FRITIDS 60x120 cm. The cot base can be placed at two different heights. One cot side can be removed when the baby is big enough to climb into/out of the cot. Your baby will sleep both safely and comfortably as the durable materials in the cot base have been tested to ensure they give their body the support it needs. The cot base is well ventilated for good air circulation which gives your baby a pleasant sleeping climate. Drawers at the bottom of the cot provide extra storage. Combine with FRITIDS drawer fronts that come in many colors.

White/white 692.531.70 **Rp5.699.000**

COMPLEMENTARY PRODUCTS

Add extra comfort and coziness to your baby's sleeping space.

HIMMELSK bed canopy. A bed canopy gives privacy and creates a room-in-room feeling.

White 003.196.30 **Rp299.000**

HIMMELSK bumper pad. With a bumper pad, you can prevent your baby bumping their head, arms or legs against the cot's hard spindels. The bumper pad is made in one piece and is very easy to put in place with the help of touch-and-close snaps on the sides.

White/grey 703.197.02 **Rp299.000**

LEN cot skirt. Adding a cot skirt to the cot gives a warm and cosy touch.

White 002.959.12 **Rp129.000**

HOW TO CHOOSE A COT MATTRESS

1. Choose your materials

Choose between sprung or foam. All materials are safe and hygienic. If you are unsure ask yourself: what type of mattress do you prefer to sleep on?

Sprung mattresses: The sprung mattresses are made with a pocket sprung construction. The construction of sprung cot mattresses allows air to flow freely, promoting good air circulation and a favourable sleeping climate. A protective foam box adds comfort and durability.

Foam mattresses: The foam mattresses use quality polyurethane or high resilience foam, which are well cut, durable and intended for sleeping therefore making both a safe choice for cot mattresses. High resilience foam is durable, relieves pressure points, and provides comfort and support for your growing baby.

2. Identify individual needs

How many years do you think you will use your cot mattress? The longer you plan on keeping the same mattress will affect which mattress you should choose. If you want to use the same mattress into the toddler years a thicker and more durable mattress will provide better support for older babies and toddlers, who like to stand and bounce in their cots.

3. Choose your mattress

On the following pages you will find all of our baby mattresses on offer, along with detailed facts for each.

GOOD TO KNOW

1. All our cot mattresses are firm, to provide a safe sleeping environment for your baby.
2. All mattresses provide some pressure relief, because they are made with materials like pocket springs or high resilience foam.
3. Well ventilated cover for better air circulation.
4. All children's mattresses promote good air flow, thanks to carefully considered choices in materials and construction.
5. Removable and machine-washable covers to create a hygienic sleeping environment for your baby.

ALL COT MATTRESSES AND PRICES

All our cot mattresses are made of safe, durable materials. Free from harmful chemicals and well-ventilated, they all provide a safe and comfortable sleeping environment for your baby. Some have handles that simplify making the bed. The materials have various properties. Foam is elastic and distributes your baby's body weight evenly. So does high resilience foam, but it also regains its shape faster

and lasts longer. Sprung mattresses have wrapped pocket springs that follow the baby's movements exactly.

For your baby's safety, always use the same size on cot and mattress to avoid gaps that the baby's head could become trapped in.

FOAM MATTRESSES

Care instructions

Cover:

PLUTTIG. This mattress is made of 5 cm thick foam and has the same soft, smooth surface on both sides. You can easily turn it over if you like. The cover can also be wiped off, but it cannot be removed.
